# Kwantum afleidingen

## 1 Hoofdstuk 1

- Photoelectric effect (p.14-15) (slides:30-36)
- Compton effect (p.17-19) (slides:37-41)
- Bohr model of hydrogen atom (p.24-25) (slides:44-53)
- Stern-Gerlach experiment (p.33-37) (slides:56-62)

## 2 Hoofdstuk 2

- Wave function with definite momentum (p.58-59) (slides:87)
- Wave packets (p.60-62) (slides:96-98)
- Gaussian wave packets (p.64-66) (slides:101-103)
- Heisenberg principle with hydrogen energy (p.72-73) (slides:104-110)
- $\gamma$-ray microscope (p.70-71) (slides:105)
- Uncertainty relation for time and energy (p.73) (slides:111-113)

## 3 Hoofdstuk 3

- Time-dependent Schrödinger (p.82-85) (slides:119-124)
- Expectation value momentum (p.92-93) (slides:129-131)
- Hermicity operators (p.95-96) (slides:135-136)
- Ehrenfest theorem (p.98-100) (slides:137-141)
- Time-independent Schrödinger equation (p.101) (slides:142-146)
- Energy quantisation (p.105-113) (slides:148-153)
- Schrödinger in momentum space (p.125-127) (slides:161-163)

## 4 Hoofdstuk 4

- free particle (p.134-140) (slides:169-173)
- potential barrier (p.150-154) (slides:175-198)
- infinite square well (p.156-159) (slides:199-214)
- parity (p.160-161) (slides:206-208)
- wave function regeneration (p.161-162) (slides:/)
- Linear harmonic oscillator (p.170-172, 174-178) (slides:215-222)
- Comparison with classical theory (p.179-182) (slides:223-225)

# 5 Hoofdstuk 5

- Postulate 6 (p.205-206) (slides:250-251)

- Heisenberg uncertainty relation (p.214-215) (slides:254-258)

- Quantum twee-niveau systeem (slides:267-270)

- Linear harmonic oscillator revisited (p.226-229) (slides:271-279)

- Evolution operator (p.232-234) (slides:280-282)

- Time variation of expectation values (p.234-235) (slides:283-284)

- Schrödinger two-body system (p.236-238) (slides:285-287)

- Schrödinger and Heisenberg (p.238-240) (slides:288-290)

- Ehrenfest theorem (p.257-258) (slides:291)
